 Vincent Sutiono

 VincentSVSutiono

An undergraduate majoring in Computer Engineering at Multimedia Nusantara University, I am passionate about leveraging technology to address real-world challenges. Throughout my academic journey, I have gained hands-on experience in areas such as web development, electronics and machine learning, continually pushing myself to learn and grow. I enjoy transforming ideas into practical solutions and collaborating with others to bring projects to life. My goal is to apply my skills in full-stack development and intelligent systems to develop innovative and effective technological solutions.

Skills

- **Soft Skills:** Teamwork, Adaptability, Communication Skills, Time Management
- **Hard Skills:** Front-End Development (React, Tailwind CSS), Back-End Development (Express, Typescript), Database Management (MySQL/PostgreSQL), Basic Electronics (Arduino), Machine Learning (Python)
- **Certifications:** Responsive Web Design - freeCodeCamp(2024), JavaScript Algorithms and Data Structures (Beta) - freeCodeCamp(2024), Relational Database - freeCodeCamp(2025)
- **Language:** English & Bahasa

Experiences

Smplhr - Jakarta, Indonesia

February 2025 - June 2025

Intern Frontend Developer

A startup company that simplifies finding, hiring, and managing talent

- Collaborated with the design team to translate UI/UX designs into functional components
- Integrated RESTful APIs to fetch and display dynamic data, ensuring seamless communication between frontend and backend systems

Tools : React, Javascript, Tailwind CSS

Projects

H&S Rajawali Motor Website

May 2026 - Now

Full Stack Developer

A project to develop a car accessories catalog website to help a local shop owner showcase their products online

- Built a responsive product catalog with real-time search and category filtering using React and TanStack Query
- Developed a RESTful API with Express and PostgreSQL via Prisma ORM to manage products, brands, and categories
- Implemented JWT cookie-based authentication to secure the admin panel for inventory management
- Integrated a WhatsApp inquiry system that generates pre-filled messages based on the customer's selected product, brand, and car specifications

Tools: React, TypeScript, Express, PostgreSQL, Prisma, Tailwind CSS

Prostate Cancer Classifier

February 2026 - Now

AI Engineer

A research project that aims to help the diagnosis of prostate cancer by classifying prostate tissue as benign or malignant

- Preprocessed image data to enhance model training
- Trained and optimized a deep learning model to classify prostate tissue as benign or malignant
- Evaluated and analysed model performance using key metrics

Tools : Python

Education

Multimedia Nusantara University (UMN)
Undergraduate Computer Engineering Student
Current GPA: 3.84/4 .00

August 2022 - August 2026

Saint Thomas Aquino Senior High School
Mathematic and Natural Sciences (MIPA)
Grade: 82,86

2019 - 2022

Organizations

ACES
Academic Member

February 2025 - January 2026

A student organization that supports the Computer Engineering student body through academic, social, and professional activities.

- Conducted peer tutoring sessions to help fellow Computer Engineering students prepare for examinations by explaining technical concepts and solving practice problems

Teater KataK
Artistic Division Member

October 2023 - July 2024

A university theater organization that produces stage performances and creative arts events.

- Worked across various artistic sub-divisions, contributing to different aspects of theater productions based on production requirements.
