in Vincent Sutiono

VincentSVSutiono

Graduated with a degree in Computer Engineering from Multimedia Nusantara University, with a strong focus on bridging the gap between hardware systems and modern software architecture. Throughout my academic and project journey, I have built hands-on expertise spanning full-stack web engineering, microcontroller interfacing, and applied machine learning. I thrive on translating theoretical principles into robust, production-ready solutions. Passionate about continuous learning and collaborative engineering, my objective is to deliver reliable, high-performance web applications and intelligent systems that solve tangible, real-world problems.

Skills

- **Soft Skills:** Teamwork, Adaptability, Time Management
- **Hard Skills:** Languages (Typescript, Python, C++), Front-End (React, Tailwind CSS), Back-End (Express, Prisma), Database (MySQL/PostgreSQL), Basic Electronics (Arduino), Machine Learning (Pytorch, Tensorflow), Tools (Github)
- **Language:** English & Bahasa

Experiences

AI Engineer (Freelance) 2026

Prostate Cancer Classifier

- Designed and trained deep learning classification pipelines utilizing **CNN** and **Vision Transformer** architectures to accurately distinguish benign from malignant prostate tissue.
- Engineered data preprocessing and augmentation workflows on high-resolution histopathology imagery to standardize tissue patches and improve model generalization.
- Achieved **96%–97% accuracy** and **sensitivity** with **98%–99% specificity**, ensuring high diagnostic reliability and minimal false negative rates for clinical decision support.

Tools : Python, CNN, Transformer, Digital Pathology

Frontend Developer (Internship) February 2025 - June 2025

Smplhr - Jakarta, Indonesia

A startup company that simplifies finding, hiring, and managing talent

- Collaborated with the design team to translate UI/UX designs into **functional & responsive** components
- Integrated **RESTful APIs** to fetch and display dynamic data, ensuring seamless communication between frontend and backend systems

Tools : React, Javascript, Tailwind CSS, Mockoon, Tanstack Query

Projects

H&S Rajawali Motor Website May 2026 - August 2026

Full Stack Developer

A project to develop a car accessories catalog website to help a local shop owner showcase their products online

- Built a **responsive** product catalog with real-time search and category filtering using React and TanStack Query
- Developed a **RESTful API** with Express and PostgreSQL via Prisma ORM to manage products, brands, and categories
- Implemented **JWT cookie-based authentication** to secure the admin panel for inventory management
- Integrated a WhatsApp inquiry system that generates pre-filled messages based on the customer's selected product, brand, and car specifications

Tools: React, TypeScript, Express, PostgreSQL, Prisma, Tailwind CSS

AWBA (AC Water Bucket Alert) May 2026

Embedded Systems Developer

Arduino-based monitoring system that alerts when an AC condensation bucket needs emptying

- Built a continuous water-level monitoring system using an Arduino UNO R3 and HC-SR04 ultrasonic sensor, converting distance readings into a real-time fill percentage.
- Designed a tiered RGB LED and buzzer alert that escalates in urgency as water level crosses set thresholds

Tools : Arduino, C++, Ultrasonic Sensor, PWM

Education

Apple Developer Academy @Bali <i>Challenge-Based Learning (Design, Coding & Professional Skills)</i>	March 2027 - December 2027
Multimedia Nusantara University (UMN) <i>Bachelor Computer Engineering (S.T.)</i> Current GPA: 3.86/4.00	August 2022 - August 2026

Organizations

ACES <i>Academic Member</i> A student organization that supports the Computer Engineering student body through academic, social, and professional activities. Conducted peer tutoring sessions to help fellow Computer Engineering students prepare for examinations by explaining technical concepts and solving practice problems	February 2025 - January 2026
Teater KataK <i>Artistic Division Member</i> A university theater organization that produces stage performances and creative arts events. Worked across various artistic sub-divisions, contributing to different aspects of theater productions based on production requirements.	October 2023 - July 2024
